High protection against natural UVA and UVB radiation

- with sun protection factor 50
- water-resistant
- very good spreadability
- absorbed quickly
- with silicone coating
- free from perfume

Healthy Skin. Safe Work.

GREVEN[®] UV TEC 50

Application Area

GREVEN[®] UV TEC 50 is suitable for outdoor work in case of exposure to intensive UV radiation. Employees in gardening and landscaping companies, in forestry, in civil engineering and road construction or in shipping are frequently exposed to such UV radiation. Also effective against UVC radiation in the range of 250 – 290 nm.

Product Description

GREVEN[®] UV TEC 50 is a water-resistant skin protection lotion against natural UV radiation with sun protection factor 50. The lotion is free from perfume and contains silicone in order to reduce the "whitening" on the skin.

Product Properties

• The beige-coloured, water-resistant sunscreen GREVEN® UV TEC 50 can be spread easily and is absorbed quickly.

Composition according to INCI

AQUA, C12-15 ALKYL BENZOATE, BUTYL METHOXY-DIBENZOYLMETHANE, GLYCERIN, ETHYLHEXYL SALICYLATE, DICAPRYLYL ETHER, ETHYLHEXYL TRIAZONE, CETEARYL ALCOHOL, GLYCERYL STEARATE, BIS-ETHYLHEXYLOXYPHENOL METHOXYPHENYL TRIAZINE, DIETHYLHEXYL BU-TAMIDO TRIAZONE, SODIUM STEAROYL GLUTA-MATE, BUTYROSPERMUM PARKII BUTTER, PHE-NYLBENZIMIDAZOLE SULFONIC ACID, TOCOPHE-RYL ACETATE, XANTHAN GUM, CAPRYLYL GLYCOL, DECYLENE GLYCOL, ETHYLHEXYLGLYCERIN, SO-DIUM HYDROXIDE, PIROCTONE OLAMINE, TITANI-UM DIOXIDE, SILVER CHLORIDE, TOCOPHEROL, DIETHYLHEXYL SODIUM SULFOSUCCINATE, PRO-PYLENE GLYCOL.

Application

Before work or rather before sun exposure, apply GREVEN[®] UV TEC 50 carefully on the skin, which previously has been cleaned thoroughly and dried carefully. Apply generously as small amounts only offer low protection. The amount of lotion to use for each part of the body fits on the length of forefinger and middle finger. Parts of the body are e.g. each arm, face and neck as well as each shank. In order to maintain the UV protection, apply several times. Especially after washing, the application of GREVEN[®] UV TEC 50 must be repeated. However, the renewed application does not extend the period of protection, but rather re-establishes the old protection status which has diminished in the meantime. Principally, GREVEN® UV TEC 50 should be reapplied every two hours.

Note

The application of UV protection agents does not exonerate from the application duty of other prescribed precautionary measures. Intensive midday sun should be avoided. Even UV protection agents with a high SPF do not provide complete protection against UV radiation. AVOID CONTACT WITH TEXTILES TO PREVENT PERMANENT STAINING!

Certificate of Dermatological Compatibility

The dermatological compatibility of GREVEN[®] UV TEC 50 has been carefully tested and proven. A printed certificate is available.

Efficiency Tests

The efficiency of GREVEN[®] UV TEC 50 has been proven with regard to: 1. sun protection factor according to international norm EN ISO 24444:2010 2. water resistance according to COLIPA method

2005 of the EU cosmetics manufacturers. 3. determination of the UVAPF and UVCPF according to ISO 24443:2012

Statutory Regulations

GREVEN[®] UV TEC 50 is subject to the Regulation (EC) No 1223/2009 on cosmetic products. Further details on handling the product can be obtained from the Group Data Sheets for skin products (for occupational use).

Storage Instructions

The product will keep for at least 30 months (from date of manufacture) if stored unopened at room temperature in the original packaging. The Period After Opening (PAO) is indicated on each tube.
